

D&D Character Database

By: Patrick Doran, Jaeha Hwang

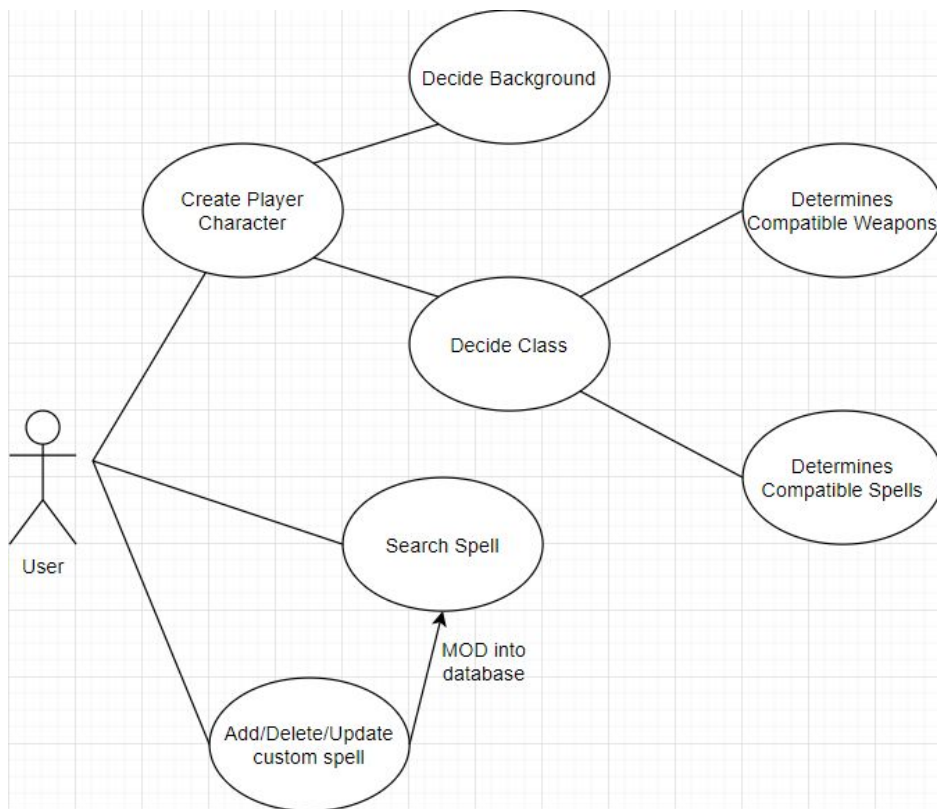

System Description

- Simulate DND character sheet with emphasis on spells
- Users create characters and manage spells
- Users can look at details of their character and associated spells and weapons
- Users can create/update/delete spells for the lookup table

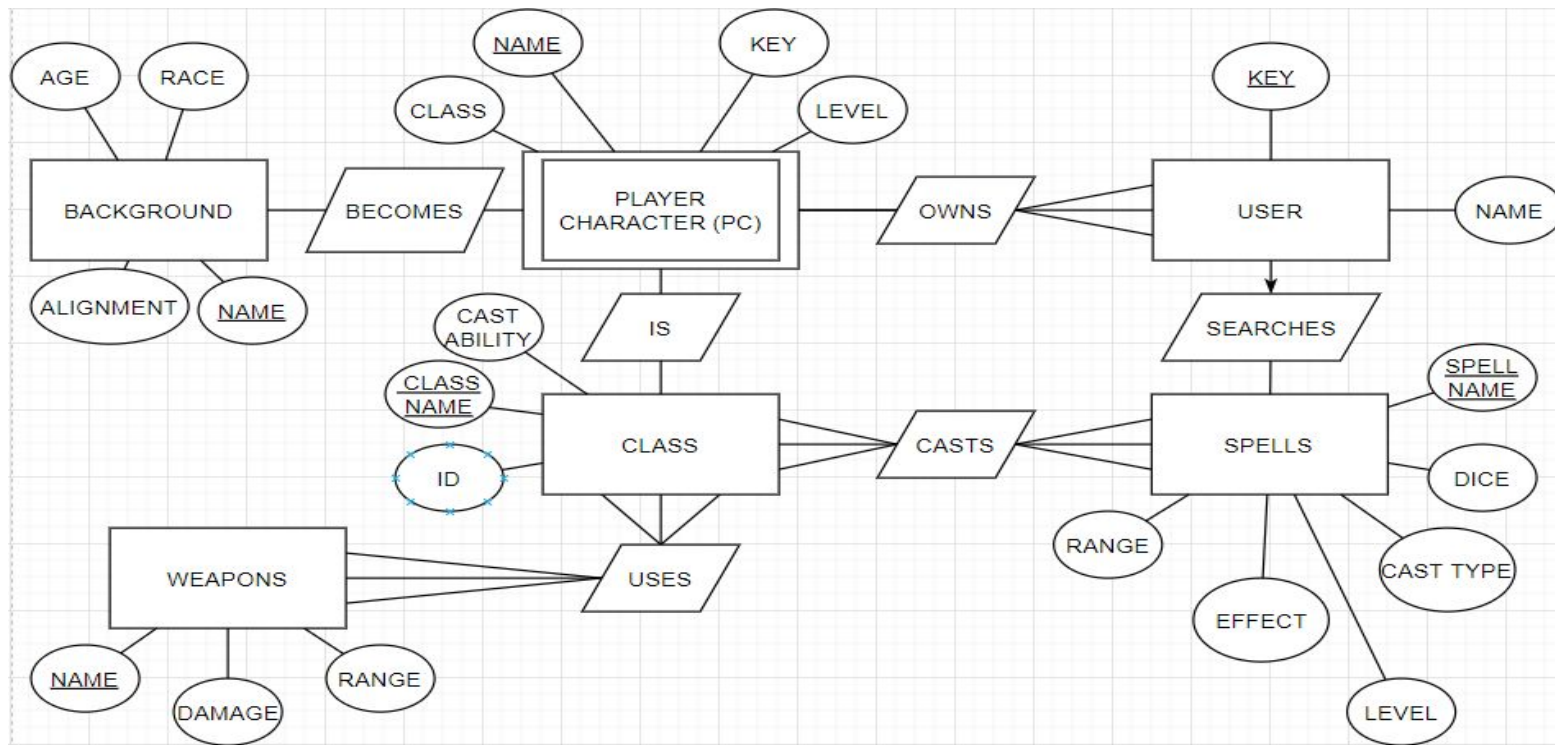

Use Cases

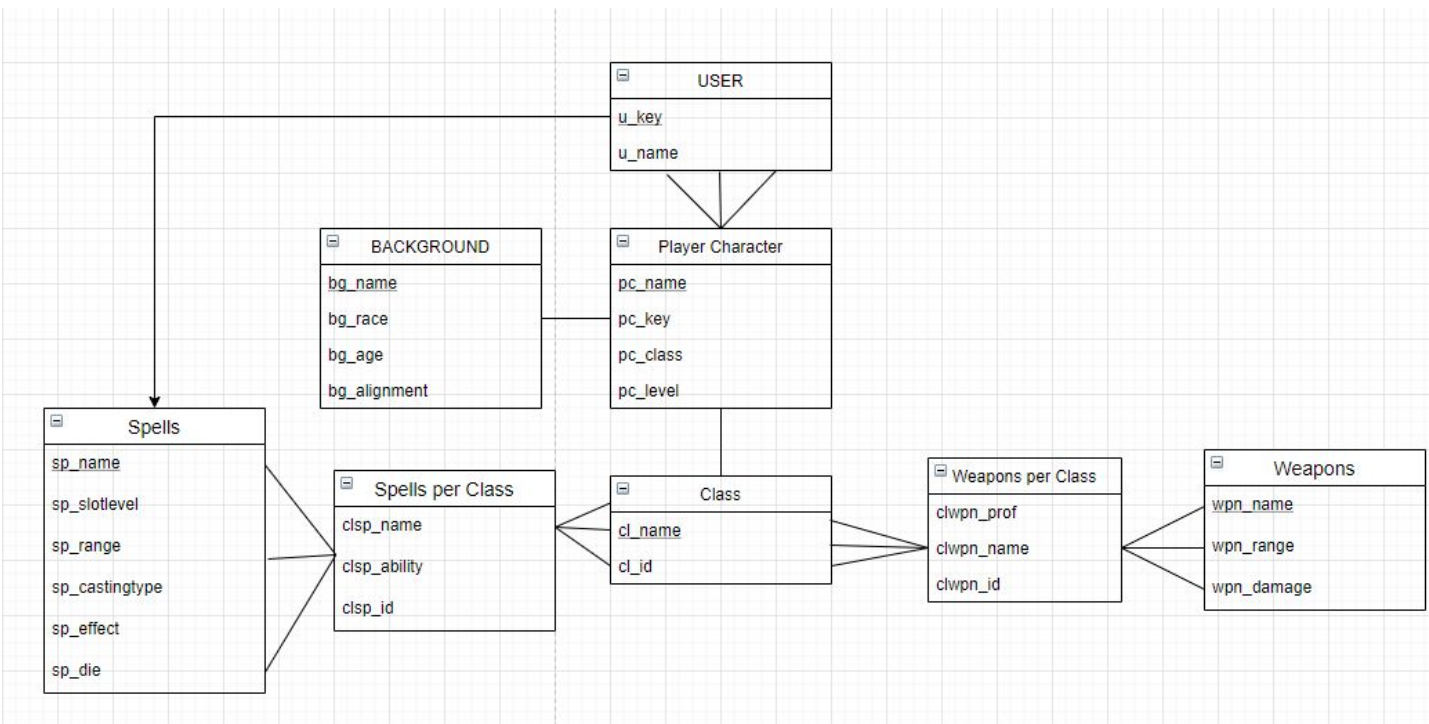

E/R Diagram

Relation Tables

Implementation Details

- SQLite for databases
- Create a web application
 - Combination of html5, CSS, and bootstrap for front end
- Django for back-end
 - SQL functions
 - Handle endpoints
